

## Group Marine Environmental Policy

Peel Ports Group (PPG) recognises that ports play an important part in the economic, environmental, and social life of surrounding communities.

The combination of these three elements allows the Groups' Statutory Harbour Authority's to exercise responsibility by promoting sustainable development for the benefit of the business and of the people linked with its Ports. Peel Ports is committed to achieving Net ZERO by 2040 and have developed a range of strategies in support.

Each port is committed to develop and implement management and control methods which prevent or minimise environment damage. These methods will be regularly reviewed to ensure that the ports continuously improve their environmental performance.

PPG recognises the value of communicating these objectives to staff; tenants and other stakeholders linked to its Ports and is committed to a programme of regular discussions about its approach to securing a high standard of environmental management.

This Policy will be reviewed again within the next 3 years.
