Peel Ports
More than Ports

Welcome

We understand that your business needs more than a supply chain provider; you want a partner who can help you to maximise the efficiency of your logistics operations, helping you to achieve your financial, environmental and customer service goals.

Our unique network of seven ports covers all sides of the UK and major centres of growth, including London, Glasgow and North West England. Each year, our teams safely handle more than 70million tonnes of cargo.

Whatever the building material, we have the facilities and capabilities to support you:

 **Handling expertise, including project cargo**

 **Specialist storage**

 **Onward road, rail and water transportation**

 **Track record of handling large scale projects**

 **A rigorous approach to minimising LTIs through our Safety365 initiative.**

 **First port operator to commit to net zero by 2040**

All of our strengths combined mean we're the ideal logistics partner for setting up construction consolidation centres that allow you to store, manufacture and distribute materials and plant.

Our Port Locations

- | | |
|--|---|
|  Clydeport |  Dublin |
|  Heysham |  London Medway |
|  Liverpool |  Great Yarmouth |
|  Manchester Ship Canal |  Peel Ports Logistics |

From ship to site, we have you covered

Peel Ports Group have a team of construction specialists who have extensive knowledge handling commodities associated with the construction sector.

Our capability, experience and safe working culture enables us to support major projects across the UK, ensuring commodities are delivered safely and on time.

Building materials we can handle include:

- | | |
|--|--|
|  Aggregates |  Special Cargo |
|  Bricks and stone |  Roof Tiles |
|  Cement and concrete |  Steel & Metals |
|  Insulation |  Timber, wood panels and plywood |

We already work with some of the largest contractors and building suppliers including:

First class facilities

At Peel Ports Group, we recognise that you and your customers require the very best when it comes to safe and timely handling to ensure control of your costs. Peel Ports' vast portfolio of world class facilities, consolidated by outstanding stevedoring operations ensures you have the tools to build on your construction success.

Our ports have extensive pre-existing infrastructure that can be deployed rapidly to support businesses. Whether you're looking to set up a construction centre, or an offsite manufacturing facility, we can help.

Benefits of using construction consolidation centres to store building materials:

- ✓ Support cost savings through facilitating purchasing economies of scale
- ✓ Improved project certainty
- ✓ A single point of contact for delivery, with visibility of stock
- ✓ Better safety, as fewer vehicles and less inventory on-site
- ✓ Lesser effect on traffic/noise local to the construction site, as the number of trucks coming and going is reduced
- ✓ Protect against market uncertainty and availability

Getting you closer to your customer

We know that location is everything, and at Peel Ports Group we are strategically placed to service any location quickly and efficiently, offering excellent road and rail transport links to meet the constant supply and demand of your customers.

London Medway

Perfectly positioned to connect London, the South East of England and the Midlands to international trade.

Overview of what we can offer you:

We have unrivalled expertise in dealing with large and heavy items from cranes to tunnel boring machines.

Access to London and the South's major infrastructure projects

Port-side space and assets for storing and moving oversized and heavy cargo

Space to stock pile materials to manage market fluctuations

Excellent Roro facilities

Opportunities to develop production facilities or construction hubs.

Port of Liverpool

Located on both banks of the River Mersey in a strategic vantage point within the North West of England.

Overview of what we can offer you:

- 

Excellent rail and sea connectivity, reduced congestion, cost and carbon emissions compared with road transport
- 

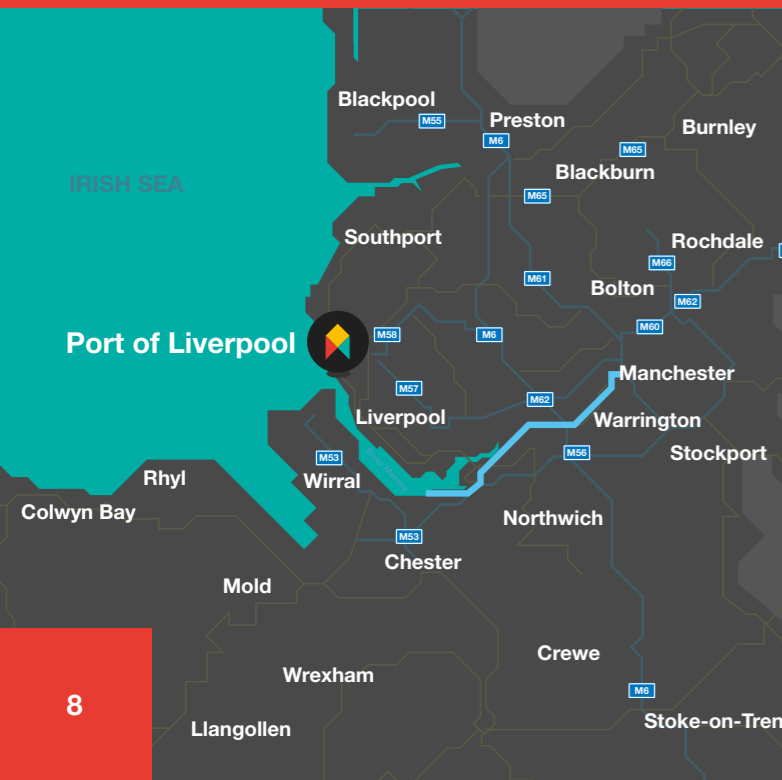

Space to stock pile materials to manage market fluctuations
- 

Storage and space to ship, store and dispatch large modular units
- 

RORO facilities for heavy plant and construction machinery
- 

Extra services including stevedoring, vanning, devanning and distribution
- 

Land for development opportunities

Great Yarmouth

A modern multi-purpose port that offers the shortest North Sea crossing to the northern continental European ports.

Key projects happening near Great Yarmouth include: Offshore Energy Construction, A11 Road upgrades

Overview of what we can offer you:

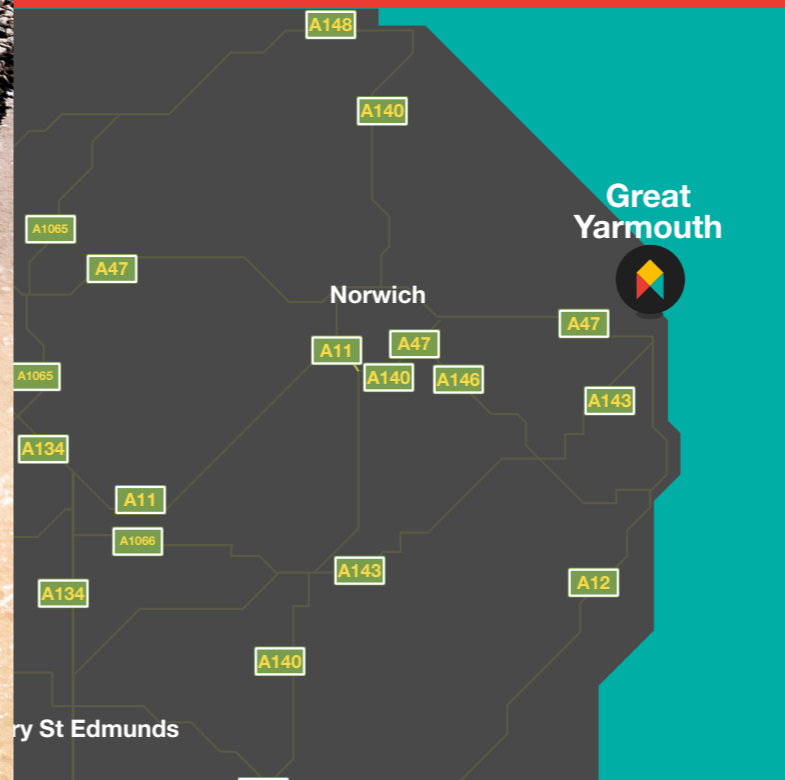

- 

Unparalleled Experience in off shore construction
- 

Importation of Aggregates & other construction materials
- 

Opportunities to develop production facilities.
- 

Excellent RoRo facilities

Clydeport

Excellent links to Glasgow and the central belt of Scotland with access to a local population of over two million.

Overview of what we can offer you:

Importation of containerised and bulk construction materials

Easy access to central Scotland

Regular UK, Ireland and Europe feeder services

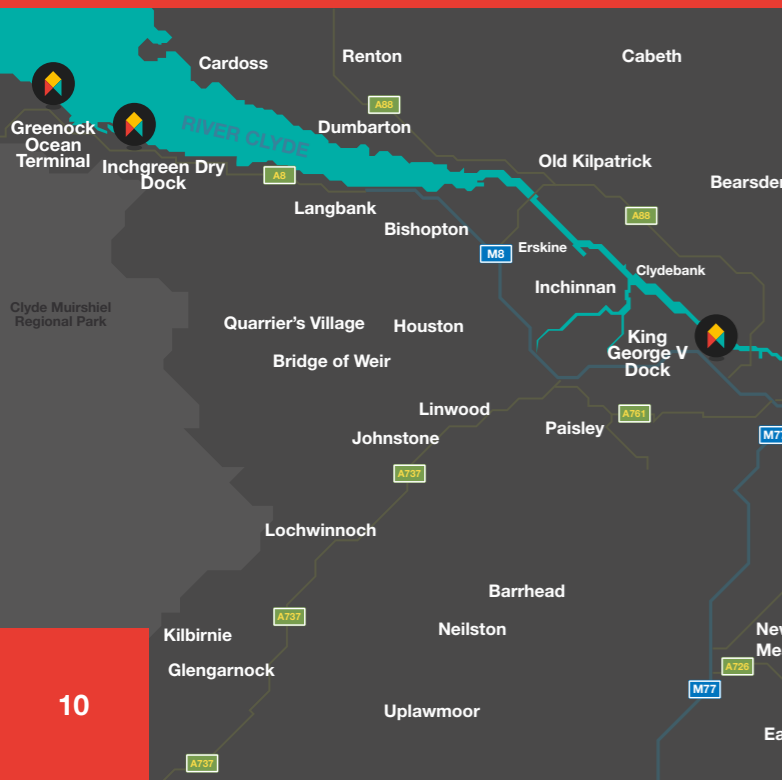

Port-side space and assets for storing and moving oversized and heavy cargo

Space to stock pile materials to manage market fluctuations

Full range of marine services

Heysham

Just 60 miles north of Liverpool Heysham is a major entry point for trade between Britain and Ireland. The Bay Gateway from the M6 brings Ireland 30 minutes closer to mainland UK.

Overview of what we can offer you:

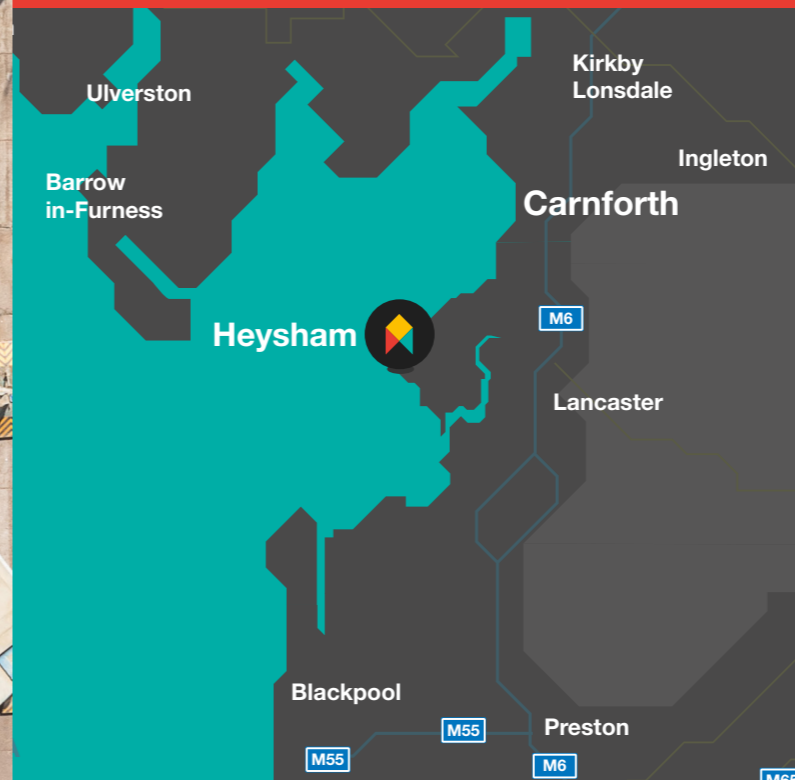

Excellent RoRo facilities ideal for heavy plant and construction machinery

Easy access to the M6 motorway

Importation of Aggregates & other construction materials

Port-side space and assets for storing and moving oversized and heavy cargo

Land for development opportunities

Manchester Ship Canal

Running from the Mersey Estuary into the heart of Manchester the Ship Canal is a 36 mile long seaway. It forms part of Peel Ports innovative 'Green Highway' and removes freight from crowded roads.

Overview of what we can offer you:

Low carbon solution to deliver products directly in to the North West and avoid road miles

Opportunities to develop production facilities or construction hubs.

Peel Ports Logistics

Peel Ports Logistics are one of the UK's leading logistics solutions companies providing a complete range of value-added services. They take the complexity out of your supply chain model to offer a cost-effective, carbon friendly service for a truly integrated 'One-Stop-Shop' logistics network.

Overview of what we can offer you:

Full Door To Door Logistics Solution

Vessel Chartering & Ships Agency

Port Storage Solutions & Project Management

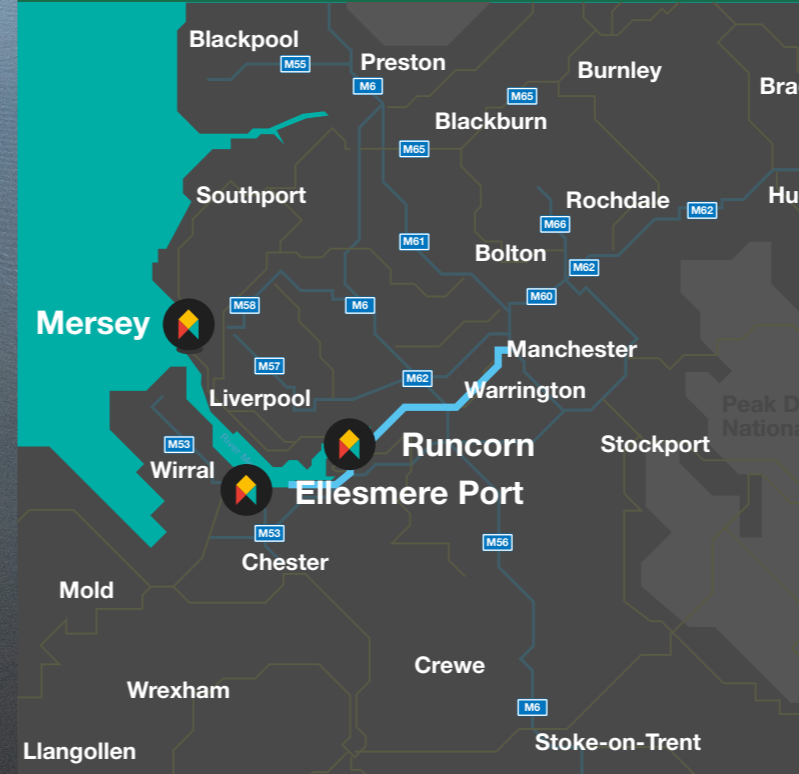

In House Transport Fleet

Final Delivery via Road or Rail

Customs Clearance Service & Consultancy

Net Zero partner

We understand that environmental, social and governance (ESG) considerations are a core requirement in the construction and building materials industry.

Looking for excellence in your supply chain is essential to help you reach your ESG commitments.

As the first port operator to commit to becoming net zero by 2040 with a fully embedded sustainability programme we will enable you meet your ESG goals.

Peel Ports is proud to partner with the Supply Chain Sustainability School (SCSS) to support the construction industry in meeting its sustainability goals. Our partnership with the SCSS enables us to be one of the only UK port operators at the forefront of this agenda, where we can be proactive in working with new and existing clients to develop sustainable solutions for projects.

NET ZERO
2040
