

# NOTICE TO MARINERS

## No 107 – 2022

### PORT OF LIVERPOOL

#### INSPECTION OF EASTHAM SANDS DREDGING PIPELINE

NOTICE IS HEREBY GIVEN that an inspection of the Eastham Sands dredging pipeline is scheduled to take place at various times on 23 and 24 November 2022.

The seaward end of the Eastham Sands dredging pipeline is indicated by a special mark buoy situated between E3 and E5 starboard-hand lateral marks.

Inspection of the pipeline will be undertaken using the workboats *CT Barnston* and *Vixen*, which will maintain a listening watch on VHF Ch.12. Whilst the workboats are on station at the pipeline, vessels navigating in the Eastham Channel must give the workboats a wide berth and pass at minimum safe speed through the water.

Furthermore, Mersey VTS will issue local navigation warnings at the times when the workboats are on station.

Unless notice is given to the contrary (which includes a local navigation warning issued by Mersey VTS), this Notice will be withdrawn at 18.00 on 24 November 2022.
