

HYDROGRAPHIC SURVEY CHARTS

As the Statutory Harbour Authority, Ardrossan Harbour Company (AHC) undertakes periodic Surveys within the port jurisdiction to include:

- Harbour Entrance, turning Circle and all berths (excluding Clyde Marina)

Hydrographic surveys are undertaken to enable Port users to have available to them information relevant to their areas of operations so that effective passage planning can be undertaken.

The provision of printed copies of charts is a chargeable service. Any enquiries regarding hydrographic survey charts should be directed to charts@peelports.com

Charts are provided on the basis that whilst every care is taken in the preparation of such charts, they are provided for general information only and are based on the data which the Port Authority possessed at the time of their preparation. It is not intended to amount to advice that can be relied upon thereafter. Although the Port Authority makes all reasonable efforts to update the information on charts, it makes no representations, warranties or guarantees, whether express or implied, that the charts are accurate, complete or up to date. No responsibility can be accepted by AHC for any inaccuracy in any chart or any omission therefrom.
