

11th September 2019

Consultation - Proposed New Positions of Lateral Marks

Channel adjacent to Greenock Ocean Terminal

A dredging campaign took place in May 2019 in preparation for the construction of a new dedicated cruise berth at Greenock Ocean Terminal. The dredging works have widened the navigable channel to allow for commercial vessels to transit safely when a large cruise vessel is moored on the new berth.

Clyde Marine Managers have conducted a review of the lateral marks and propose the following locations (it should be noted that the buoys have been moved to the following positions per CNTM 70/2019).

- No 4: 55 57.4387N 004 45.4489W
- No 8: 55 57.1310N 004 45.1381W
- No 12: 55 57.0082N 004 44.9343W
- WQ: 55 57.0849N 004 45.2697W

(WQ = West Quay Buoy)

We welcome feedback from stakeholders and invite responses by 9th October 2019 when this consultation will close.
