NOTICE TO MARINERS

No 44/20

FIRTH OF CLYDE – GREENOCK OCEAN TERMINAL
CRUISE BERTH INSTALLATION WORKS

Chart 1994

Mariners are advised that work to install the pontoon structures for the new Greenock Ocean Terminal Cruise Berth has now been made safe. Completion of the works, and installation of access bridges and final berth commissioning, remains to be completed at a later date, with all work onsite currently suspended for the duration of the COVID-19 restriction period. Barges involved in the project have been positioned between the new berth and existing quay wall for safety reasons.

The temporary navigation lights (two vertical all round green) on the extreme east and west ends of the structure remain in place. These will be permanent lights on completion of the project.
