

Mariners are advised that maintenance dredging is planned in the River Clyde from Tuesday 9th June for a period of approximately 10 days. The dredger Norma 2 will carry out the dredging supported by survey vessel 66K. Pre-dredging surveys will take place from Sunday 7th June.

Dredging areas are KGV Dock, River Cart entrance and vicinity of No 12 River Buoy.

Both vessels will be limited in ability to manoeuvre during operational periods so vessels should navigate with additional care when transiting the River Clyde. A listening watch will be maintained on VHF Ch 12.
