

Mariners are advised that work to replace the military range at Baron's Point is planned from Monday 10th August for a period of approximately two weeks. This work will include the removal of the existing range and installation of new range equipment which will be in a new position as indicated on the drawing below.

Work will be conducted by divers working from the workboat Laura M and all appropriate signals will be displayed. During operational periods the vessel will be restricted in ability to manoeuvre so mariners should navigate with additional care when transiting the area.

A listening watch will be maintained on VHF Ch12.
