

Mariners are advised that maintenance dredging is planned at BAE Scotstoun in the River Clyde from Friday 10th July for a period of approximately 7 days. This work will be carried out by the vessels Freeway and Norma II supported by survey vessel F48. Freeway will transit from Scotstoun to the disposal site at Cloch Point as required.

The vessels may be restricted in ability to manoeuvre during operational periods so mariners should navigate with additional care when transiting the area.

A listening watch will be maintained on VHF Ch12.
